JoWood Productions Software AG increased its revenues of the first 9 months by 8,7% to EUR 18,6 million.

EBIT for the first 9 months of FY 2008 amounts to EUR 1,8 million. Because of the focus on distribution titles on console and PC in the third quarter (75% of the Q3 lineup consists of distribution titles), an increase of distribution costs has been registered. In the third quarter, no titles in the scope of core brands (= publishing titles) have been released.

With significantly reduced investment risk (as per September 30th 2008, 13,6% of the total equity have been invested, previous reference period: 18,1%), the turnover of investments in revenues have been increased to 493%, i.e. the total investment volume has been turned over approximately 5 times, whereas

investments of the previous year's reference period turned over approx. 3,7 times.

The cost-conscious investment policy combined with the strong distribution network enables an increase in revenues with a lower investment volume.

Additionally, the invested funds have been spread on a significantly higher amount of titles and multiple, widespread and established console platforms (Nintendo® Wii™, Nintendo® DS™).

The following titles were released in the third quarter:
